IDM Software

Enables remote data analysis from any assigned TMS sensor. Inductosense Data Manager (IDM) is a windows application that can be used to log, view and analyse data from the Inductosense WAND data collector. The WAND connects to the PC to import the data to the IDM software.

- Corrosion/erosion rate trending
- Set thickness thresholds to help with detection of structure degradation
- Easy configuration of the WAND Probe using USB interface
- Visual representation of thickness changes for individual and multiple sensors
- Analyse raw ultrasonic signals
- Export raw UT measurement files
- Sensor configuration
- Export Corrosion Reports for use in other tools
